## RIGHT-SIZED PERFORMANCE

The J70 brings the same proven EAVision flight intelligence and spray precision found in the J150—scaled for personal acres and light custom work.

- Precision spray control with adjustable droplet sizing
- Intelligent terrain following and obstacle avoidance
- Consistent coverage without over-application
- Built on the same trusted EAVision platform

No entry-level compromises—just the right fit.

*\*During field testing. Actual results will vary due to field conditions, firmware evolutions, etc.*

### THE J70 IS A GREAT FIT FOR:

- Farmers and smaller-scale custom applicators
- Row crop and specialty crop applications
- Highly sloped and challenging field conditions

## RIGHT-SIZED PERFORMANCE

- 45 L spray tank and 50 kg spreader load
- Max spraying speed: 48 km/h\* with full obstacle avoidance and terrain following enabled
- Spray flow rate: up to 23.8 L/min
- Adjustable droplet sizes from 10 to 620 microns
- Covers up to 20 hectares/hr at an 18.7 L/ha rate.

## SMARTER TECHNOLOGY

- LIDAR technology enables industry leading obstacle avoidance and terrain following
- CCMS nozzles provide fine, uniform atomization with adjustable droplet sizes (10-620 microns) at up to 23.8 L/min
- Enhanced atomizer nozzles combined with powerful motors allow for superior canopy penetration and great overall coverage for a variety of applications.

*\*Actual results will vary due to field conditions, firmware evolutions, etc.*
